SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science (CGPA 8.17) with hands-on experience building ML pipelines, statistical models, and NLP/transformer systems, plus BI/ETL work in Power BI and Snowflake. Delivered a hackathon-winning ML prototype, benchmarked deep-learning models for text summarization during an AI internship, and hold certificates spanning NVIDIA Deep Learning, IBM, Oracle OCI AI, AWS, and Kaggle. Seeking a Data Science / Data Analyst internship or entry-level role to apply strong Python, statistics, and modeling skills to real-world business problems.

TECHNICAL SKILLS

Data Science & ML: Python, Pandas, NumPy, scikit-learn, Statistical Analysis, EDA, Data Cleaning & Preprocessing, Feature Engineering, Regression & Classification, SVM, Naive Bayes

Deep Learning & NLP: Transformers (BART, PEGASUS, T5, Longformer), NLP, OCR (EasyOCR/Tesseract), Model Evaluation

Generative AI: OpenAI GPT-4o, Google Gemini, DeepSeek R1, Prompt Engineering, RAG, Conversational AI/Chatbots

Data Visualization: Matplotlib, Seaborn, Power BI, Power Query (M), DAX, Star-Schema Modeling

Databases & Data Engineering: SQL, MySQL, Snowflake (SQL & Warehousing), ETL Pipeline Design, REST API Integration

Cloud & Tools: AWS (Storage Fundamentals), Oracle Cloud Infrastructure (AI Foundations), Google Cloud Basics, Docker, Git/GitHub, Linux, Streamlit, Flask

Languages: Python, SQL, JavaScript, HTML/CSS

Soft Skills: Team leadership, technical writing, critical thinking, communication, mentoring

WORK EXPERIENCE

Suvidha Foundation (SMM NGO) — Artificial Intelligence Intern (Remote) *07/2025 – 08/2025*

- Implemented and benchmarked deep-learning models for **abstractive text summarization** using Transformers (BART, PEGASUS, T5, Longformer) on large-scale datasets.
- Designed reproducible **ML pipelines** with documented preprocessing, hyperparameters, training configurations, and evaluation via **ROUGE and BERTScore** metrics.
- Built performance-visualization workflows with Matplotlib and Seaborn; authored IEEE-format research write-ups with supporting diagrams and decks.
- Collaborated in daily stand-ups and maintained version-controlled documentation via GitHub.

ClickGenius Pvt Ltd — Development Engineer (Remote) *06/2023 – 07/2023*

- Engineered and maintained a MySQL relational database managing 100+ records for a client-facing web platform, ensuring reliable data interaction and retrieval.

DATA SCIENCE & ML PROJECTS

Real-Time Weather ETL Pipeline & Power BI Dashboard *05/2026*

- Engineered an end-to-end **ETL pipeline** replacing static datasets with live weather-API integration across 6 cities in Maharashtra, using Power Query (M) to extract, clean, and flatten nested JSON payloads
- Designed an optimized **star-schema** semantic model with bi-directional cross-filtering and authored 17 custom **DAX** measures, including AQI health-band categorization.

ESP32-Based Air Quality Monitoring & Environmental Analytics Dashboard *05/2026*

- **Technologies** : Python, Streamlit, ESP32, REST API, DHT11, MQ-135, Plotly
- Developed an IoT-based environmental monitoring system integrating ESP32, DHT11, and MQ-135 sensors to collect real-time temperature, humidity, and air-quality readings.
- Built a REST API using ESP32 WebServer to transmit sensor data in JSON format and integrated it with a Python Streamlit dashboard.
- Implemented real-time visualization, AQI-style classification, historical trend analysis, and derived environmental metrics including heat index, dew point, and humidity.
- Added local JSON/CSV data persistence for offline dashboard functionality to retain and display previously fetched readings

Smart Attendance System — BLE + Facial Recognition *03/2025*

- Built a smart-attendance prototype pairing BLE proximity sensing with facial-recognition verification; secured **1st Place** at IoT Arena Hackathon, JNEC (MGM University).

Predicting Python Requirements in Data-Analyst Jobs (LinkedIn NLP) *05/2025*

- Scraped and cleaned Data Analyst job postings from LinkedIn; applied **NLP and supervised ML** to predict whether Python is a required skill for each posting.
- Combined prompt-engineering-assisted feature extraction with statistical analysis and visualization to surface labour-market patterns.

Diabetes-Risk Prediction Web App *2026*

- Built a Streamlit app predicting diabetes risk on the Pima Indians dataset using an **SVM classifier**, with probability gauges and model explanations.

Fake-News Detection Model *2026*

- Built a fake-news classifier using **TF-IDF** features and a classical ML baseline on a public news corpus; documented feature-engineering and evaluation trade-offs.

COVID-19 Healthcare Analysis & Prediction *05/2025*

- Applied data-science techniques to a healthcare dataset to predict COVID likelihood; built cleaning, EDA, and modeling notebooks in Python.

Sentiment Analysis for Spam Text Identification *2024*

- Trained a **Multinomial Naive Bayes** classifier on a supervised text-classification dataset, architected for pipeline integration into web/messaging platforms.

EDUCATION

Maharashtra Institute of Technology (MIT), Chh. Sambhajinagar *Aug 2024 – Jul 2027 (Expected)*

B.Tech, Artificial Intelligence & Data Science | CGPA: 8.17 / 10.0

- Relevant Coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, DBMS, Applied AI, Data Analytics, Prompt Engineering (Honors), Research Methodology.

MIT Polytechnic, Chh. Sambhajinagar *Oct 2021 – Jun 2024*

Diploma, Artificial Intelligence & Machine Learning | 77.61%

- Relevant Coursework:

CERTIFICATIONS

- **Microsoft —** Azure AI Fundamentals (2026)
- **Oracle** — Oracle Cloud Infrastructure 2026 Certified AI Foundations Associate.
- **NVIDIA** — Fundamentals of Deep Learning; Building Transformer-Based NLP Applications; Building LLM Applications with Prompt Engineering.
- **NPTEL (IIT Madras)** — Python for Data Science (Jan 2025).
- **IBM / Cognitive Class** — Getting Started with Artificial Intelligence; Statistics 101; Python for Data Science.
- **Snowflake / DataCamp** — Introduction to Snowflake; Introduction to Snowflake SQL.
- **Kaggle** — Python, Pandas, Intro to Machine Learning.
- **Coursera** — Tweet Emotion Recognition with TensorFlow (Jul 2024).
- **Udemy** — Power BI 101 - Microsoft Power BI Essentials.

AWARDS & HONORS

- 1st Place — IoT Arena Hackathon, MGM University (Mar 2025): Smart Attendance System with BLE + facial recognition.
- 3rd Place — State-Level C Programming Competition, MIT.

LEADERSHIP & VOLUNTEERING

- **Snowflake Mentor –** Mentored over 45+ students and cordinated in counducted snowflake events (2026)
- **IGNITE Student Association** — Core Council Member and Tech Co-lead (2026–2027); contribute to internal tooling and event planning.
- **MIT-CSN Coding Club** — Volunteered Session Lead for C Programming & GitHub workflows for 200+ students (2024–2025).
- **Nvidia Workshop —** Coordinated a 2-day NVIDIA hands-on workshop on Deep Learning for 100+ Students
